SHAD | Pioneers in expandability, presents the new expandable side case.

A telescopically expandable case with a compensated tension cable system.

ENGINEERED FOR RIDING

SH38X / EXPANDABLE

INSPIRATION

TENSEGRITY is a form of construction that uses rigid elements interconnected by tensioned cables or ropes to create strong, flexible, and adaptable structures. It is used in structural engineering, architecture, and mechanical systems design. In nature we find it in the human body within the bone structure, the muscular system, the connective tissue, as well as spider webs, bird nests and fern leaves.

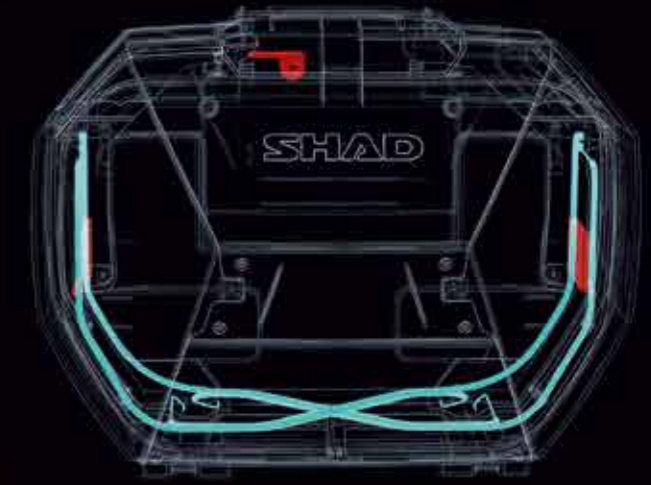

DESIGN PROCESS

SH38X / EXPANDABLE

HOW IT WORKS

To allow a smooth and uniform expansion, SHAD developed a tension cable system with 4 incorporated guides inside of the case's frame. Creating **DYNAMIC TENSEGRITY**.
